Product Description

This redundancy module cable does not need any type of ground isolation because it is a fiber-optic interface;
It uses only one fiber-optic channel for transmitting and receiving information between the primary and secondary
PLCs.Installing and configuring the redundancy feature in PLC PLC systems is a task that should only be performed by highly trained electrical personnel;
It is important to remember that the 1757-redundancy module cable should not be bent around sharp edges, and that it should not be cut, run over, abraded, or otherwise damaged during installation;
The total light loss through the cable needs to be less than or equal to 7 dB at 1300 nm wavelength for the redundancy system to work properly.

Mainly Products

PLC module	Redundancy Module
DCS module	Analog input module
CPU module	Analog output module
IO module	Digital input module
DO module	Digital output module
AI module	Relay Output Module
DI module	Relay Input Module
Power Module	Motion control module
Ethernet module	Network communication module

Application

1.Power industry, the elevator industry, parking, automobile, auto ancillary.
2.feed industry, aluminum smelting machines, refrigeration industry.
3.steel industry, combustion control systems, non-ferrous metal smelting.
4.glass industry, construction machinery, textile machinery, water treatment

Best Services Assurance

1.High quality
2.Fast Delivery
3.We provide a large number of brand new in stock.
5.There are many products in stock.
6. We only provide the original new items, 100% make sure the best quality!
